Tenon® Bonding Additive Color Admix is a high-solids, tinted acrylic bonding admixture that enhances adhesion and improves the strength and durability of non-modified cement-based mortars, repair products, tile setting mortars, and grouts. It also improves workability, extends open time, boosts freeze/thaw and salt resistance, helps reduce efflorescence, and provides excellent UV resistance. Its concentrated formula can be diluted with water on-site for added convenience and cost savings.

TENON®

Bonding Additive Color Admix

Uses

As a cement additive in non-modified mixes:

- Portland cement/masonry products
- Portland cement-based repair products
- Portland cement-based grouts
- Reduces water absorption

Typical Mix Ratios	Mix Ratio		Total Liquid
	Water	Bonding Additive Color Admix	
Product	**Typical Quarts (L) of Liquid**		
80 lb. (36.3 kg) Mortar Mix	3 ¾ qt. (3.5 L)	1 ¼ qt. (1.1 L)	≈ 5 qt. (4.7 L)
60 lb. (27.2 kg) Mortar Mix	3 qt. (2.8 L)	1 qt. (0.95 L)	≈ 4 qt. (3.78 L)
60 lb. (27.2 kg) Concrete Mix	1 ¾ qt. (1.65 L)	1 ¾ qt. (1.65 L)	≈ 3 ½ qt. (3.5 L)
60 lb. (27.2 kg) Sand Mix	2 ¼ qt. (2 L)	2 ¼ qt. (2 L)	≈ 4 ½ qt. (4.25 L)
50 lb. (22.7 kg) Mortar Mix	none	8.5 qt. (8 L)	≈ 8 ½ qt. (8 L)

Available In:

Tenon® Bonding Additive Color Admix is available in 1 qt. bottle, 1 gal. bottle, and 5 gal. pail.

5 Gal
BOM #115344

1 Gal
BOM #115343

1 Qt
BOM #115322

For professional use only.

It is the responsibility of the installer/applicator to ensure the suitability of the product for its intended use. For technical assistance, please contact TCC Materials. To acquire technical and safety literature, please visit our website.
