

COLORED MORTAR MADE EASY!

**1 CAN + 1 BAG =
PERFECT COLOR
EVERY TIME!**

SPEC MIX® MORTAR COLOR is dry pigment consisting of synthetic iron oxide pigments that are specifically weighed to ensure colored mortar uniformity and consistency when mixed with SPEC MIX Masonry Mortars. Each color container is formulated to match, as close as possible, the representative color in the SPEC MIX Colored Mortar display kit. To achieve the specified mortar color, mix one Mortar Color container with one 80 lb (36.2 kg) bag of preblended SPEC MIX Masonry Mortar.

SPEC MIX®
