

Cherry Stone Traction Grit

100% Natural Quartzite Grit for Winter Traction

©TCC MATERIALS® • January 2020 Version 1.6

Product Description

Cherry Stone® Traction Grit is a fine, sharp, crushed rock which offers natural relief from the icy conditions of winter. Unlike salt, our 100% natural quartzite pebbles give you immediate traction on icy walks, steps, and driveways without hastening the deterioration of concrete surfaces. Cherry Stone grit will not dissolve or become muddy like softer limestone grits and is non-polluting and non-staining. Simply sweep up in the spring. Also keep in your vehicle to use for both additional winter weight and emergency traction. Cherry Stone grit is also used for hobby crafts, aquariums, and flower pot drainage.
