ADVANTAGES/USES	 Durable, Portland-limestone cement-based repair mix for concrete pavement, industrial floors, and structural concrete Can be mixed with air-entraining admixture Produced in accordance with MnDOT inspection program Commercial use 	 Durable, air-entrained, Portland-limestone cement-based repair mix for concrete pavement, industrial floors, and structural concrete Can be mixed with Fast-Set Liquid Activator for 4-5 hr. open to traffic Commercial use 	 High-performance, super plasticized, Portland-limestone, cement-based, engineered con- crete mix for small structural projects or when ready-mix truck access is restricted Pumpable Commercial use Corrosion inhibitor 	 High-performance, super plasticized, Portland- limestone cement-based, engineered concrete mix for small structural projects or when ready-mix truck access is restricted Pumpable Air-entrained for freeze-thaw durability Corrosion inhibitor 	 Cement based product for resurfacing concrete floors with damaged finishes or as a wear surface Provides smooth, hard, flat surface Underlayment or wear surface Accepts foot traffic in 6 hours 	 Self-consolidating, excellent placement characteristics Polymer-modified for in- creased adhesion and flexural strength Integral penetrating corrosion inhibitor Enhanced with silica fume Does not require mechanical vibration consolidation Fiber reinforced to control shrinkage cracking

s/USES			<image/>	Rapid Patch® too	Rapid Patch® 200 Result Patch® 200 Result Resul
ADVANTAGES/USES	 High-strength, fast-setting, low shrinkage, hydraulic cement mortar for concrete repair and overlays Suitable for DOT horizontal concrete repairs Can be extended with %" minus aggregate (up to 30 lb. pea gravel per 50 lb. Commercial DOT Repair Mix) Commercial use 	 Designed for concrete repair and overlay applications requiring high durability. Increased flexural strength and adhesion Improves impact and tensile strengths Contains no chlorides or magnesium phosphates Compatible with Portland-limestone cement Suitable for DOT horizontal concrete repairs Cement based, non-corrosive Commercial use 	 Polymer-modified for excellent bond Fiber reinforced for high flexural strength, provides excellent ductility Very low-chloride permeability and corrosion inhibitor protects reinforcing steel Rapid strength gain—over 4,500 psi 1 hour from start of mixing 	 A fast-setting, high strength, cement-based repair mortar designed for applications where high early strength is needed Improves impact, flexural and tensile strengths Contains corrosion inhibitor No chlorides or magnesium phosphates Compatible with Portland-limestone cement Suitable for DOT horizontal repairs Commercial use 	 A rapid-setting, fiber reinforced, high-strength, polymer-modified cement No bonding agent needed Alkai resistant fibers Corrosion inhibitor No chlorides or magnesium phosphates Compatible with Portland-lime- stone cement Suitable for DOT horizontal concrete Commercial use
