

Superior Paver Installation Support

NorthRock Edge Loc Superior Concrete Paver Edging is a specially formulated blend of hydraulic cement, graded aggregates, polymers, fibers, and performance admixtures. It is designed to provide lateral support and stability to paver installations. The polymer-modified fiber-reinforced formula is designed to be freeze-thaw durable and flexible enough to accommodate soil movements without deteriorating. Easy to use; just add water formulation.

Use For:

Concrete & Stone
Paver Installations
