

Spec-Finish

**High-Performance
Coated Masonry Wall System**

Spec-Finish

SPEC-FINISH® combines special smooth and tight textured SPEC-SURFACE™ block from CPG with high performance coatings from Tnemec. SPEC-SURFACE may also be used with ordinary paint coatings.

Primary Uses

- Coated walls where a pinhole free surface is required.
- Coated walls for applications requiring a high performance surface finish, such as hospital interiors, food preparation areas, animal care facilities, clean rooms, restroom facilities and other areas requiring easy cleaning and/or maintenance of hygienic conditions.
- Coated walls for high vapor conditions, such as indoor swimming pools, aquariums or vivariums.

Features

- SPEC-FINISH blocks are made with a special mix design including a pre-conditioner that results in an especially tight and smooth surface texture.
- SPEC-FINISH walls offer superior performance for applications with exacting hygienic requirements - both the block and mortar joints are fully coated, and the coatings may also be applied to flooring and ceilings to provide comprehensive coverage.

Construction Efficiency

- The smooth and tight surface texture results in labor and time savings when compared to using traditional CMU by minimizing need for block filler layers prior to painting or coating.
- SPEC-FINISH is significantly less expensive than alternate approaches for its intended applications, such as glazed tile or CMU.

Spec-Finish System Levels

Standard Block Finish (Level I)

Cost-Effective for Lighter Duty Applications

Orange Peel Block Finish (Level II)

Pin-Hole Surface for Greater Cleanability

Smooth Block Finish Finish (Level III)

Pin-Hole Free Surface with Smooth Finish

LEVEL I
STANDARD BLOCK FINISH

SPEC-FINISH® Block
Special mix design and pre-conditioner
Prime Coat
Waterborne Cementitious Filler
Intermediate Coat
Modified Polyamine Epoxy
Finish Coat
Aliphatic Polyurethane
Application: Roller-applied

LEVEL IV
SMOOTH BLOCK FINISH
(PINHOLE FREE SURFACE)

SPEC-FINISH® Block
Special mix design and pre-conditioner
Skin Coat (thinnable)
Epoxy Filler and Surfacers
Fiberglass Mat
Fiberglass Reinforcing Mat
Saturated Coat
Modified Polyamine Epoxy
Intermediate Coat
Modified Polyamine Epoxy
Finish Coat
Aliphatic Polyurethane
Application: Spray-applied

LEVEL III
SMOOTH BLOCK FINISH
(PINHOLE FREE SURFACE)

SPEC-FINISH® Block
Special mix design and pre-conditioner
Prime Coat (2 coats)
-Waterborne Cementitious Filler
Intermediate Coat
Modified Polyamine Epoxy
Finish Coat
Aliphatic Polyurethane
Application: Spray-applied
*Prime coat must be back-rolled and squeegeed.

Three chemical-resistant, high-performance finish levels to meet a variety of aesthetic and performance requirements
