OUTDOOR FIREPLACES & OVENS

**OUTDOOR FIREPLACES & OVENS**

## King of Hearths outdoor fireplaces add warmth and elegance to any outdoor entertaining area.

King of Hearths pre-cast fireplaces, ovens and side boxes are easy to handle and set up. The fireplaces are lined with fire brick and come pre-assembled as do the ovens and side boxes. The units are ready to be placed, stacked and veneered. Whether you are building a new outdoor living space or adding to an existing one, you can feel confident knowing King of Hearths products have been engineered with high strength concrete made to stand the test of time and rigors of any climate!

King of Hearths pre-cast products are among the easiest to set up. The 2- or 3-piece mortarless forms require no frost footings in colder climates – a 10” to 12” aggregate base or concrete slab is all the foundation needed. Unique options such as tumbled dry-stack retaining walls or a myriad of stone and brick options can be utilized to custom finish your KOH unit.

Make your outdoor living space your own with customized finishing to complement your style.

	<b>KING ARTHUR</b>	<b>GUINEVERE</b>	<b>LANCELOT</b>	<b>SIDE BOX</b>
Weight	2065#	1698#	2000#	260#
Angle Iron Piece	48"	32"	N/A	N/A
Stone Veneer	63 sf	46 sf	26-30 sf	12 sf In/Out
Lin ft Corners	36	28	18	36 (corners may vary)
Sparker Cap Mount Size	13" x 13"	13" x 13"	9" x 9"	N/A

- Units must be veneered with brick, stone, or Borgert Strassen Wall. Units include fire brick already installed and forking points for ease of setting in place with machine.

- Stress cracks in fireplaces and ovens are micro fractures that are a normal occurrence and do not affect the structural integrity of the unit, nor are grounds for rejection.

- Lancelot oven must be veneered with high density insulation, meshed and scratch coated to ensure a good bond with the veneer.

- All Units must have spark protector with solid top to keep water out, not included.

King Arthur with Strassen® Wall by Borgert

## Outdoor Oven Recommended Accessories:

- Welders gloves
- Long-handled tongs for placing wood when feeding the coals
- Long-handled peel for placing and removing bread/pizza from the oven
- Steel brush/rake for pushing coals to the back of the oven
- Stainless steel pan for cooking chicken, ribs, roasts

## Outdoor Oven Baking Tips:

Baking in the outdoor oven is like an art. Any kind of wood works - oak, elm, apple (adds flavor). Some woods burn hotter (like oak) and depending on how dry your wood is will affect how it burns. Initially build the fire with 1”- 2” diameter logs. You can use 4”- 5” diameter logs as coals build and for stoking the fire while baking. We recommend building the fire in the front and pushing it to the back while stoking as coals form to maintain a small flame, thus creating more coals to bake.

Wood-fired ovens typically do not have doors; a door turns your oven into a smoker. A local metalsmith can build a custom door; we would recommend something with wooden handles and an adjustable vent opening.
