

# TENON®

## Super Diamond Glaze

## Ready to use with easy application

Tenon® Super Diamond Glaze is a sprayable, high-gloss curing and sealing agent that delivers a durable wet-look finish in one application. This UV-stable, non-yellowing sealer enhances and protects colored concrete, exposed aggregate, and other cementitious surfaces while improving resistance to weathering, chemicals, and stains.

### Features:

- Enhances and darkens color with a high-gloss finish
- UV-stable, non-yellowing, and non-staining
- Ready to use; easy application by sprayer, roller, or applicator
- Penetrates concrete to reduce dusting, spalling, and aggregate pop-outs
- Protects against moisture, stains, chemicals, salts, and freeze-thaw damage
- Fast drying (~2 hours), abrasion-resistant, and easy to re-coat

### Application

- Apply when air and surface temperatures are 40°F–100°F (4°C–38°C) and product temperature is above 50°F (10°C). Avoid direct sunlight.
- For enhanced protection, apply one coat of Cure & Seal followed by a top coat of Super Diamond Glaze.
- Apply by low-pressure sprayer, roller, or short-nap applicator at 200–500 sq. ft. per gallon. Use solvent-compatible sprayer fittings and hoses.
- Work product evenly into concrete; avoid pooling, runs, or sags. Surface should appear uniform.
- Allow the first coat to dry completely before applying a second coat, if needed.

### Exposed Aggregate

- Apply in two coats: a thin curing coat followed by a heavier top coat for color enhancement and protection.
- If used as a curing compound, wash surface with a mild acid solution, rinse thoroughly, and allow to dry before application.
- Apply final coat after the exposed aggregate has fully cured.

### Note

- Product will darken concrete, especially if applied heavily. Test in an inconspicuous area prior to full application. Surfaces must be clean and dry.

Approximate Coverage @ 70°F (21°C)	Sq. Ft. / Gal.	M <sup>2</sup> / L
Curing exposed aggregate	300 - 500	7.3 - 12.3
Second coat, cured concrete, burnished block	300 - 500	7.3 - 12.3

### Available In:

Tenon<sup>®</sup> Super Diamond Glaze is available in 1 gal. bottle, 5 gal. pail, and 55 gal. drum.
